

Software Requirements Specification (SRS) Rural School Management & Communication System (RSMCS)

1. Introduction

1.1 Purpose

Defines requirements for a rural school system improving communication, administration, and academic tracking.

1.2 Scope

- Student enrollment and records
- Attendance tracking
- Academic performance tracking
- Fee management
- Parent-school communication (SMS/USSD)
- Teacher dashboards

1.3 Users

- Administrators
- Teachers
- Students
- Parents
- Community leaders

2. Overall Description

Hybrid system with mobile app, SMS/USSD, web dashboard, and cloud backend.

3. Functional Requirements

- Student registration and records
- Attendance tracking with SMS alerts
- Grade input and report cards
- Fee tracking and reminders
- Announcements and messaging

4. Non-Functional Requirements

- Fast SMS/USSD response
- Offline capability
- Simple UI (low literacy support)
- Secure access control
- Scalable architecture

5. System Architecture

- Mobile App (Android)
- USSD Gateway
- SMS Gateway
- Web Admin Portal
- Cloud Database

6. Data Requirements

- Students, Teachers, Classes
- Attendance, Grades, Payments
- Announcements

7. Use Cases

- Parent checks results via USSD
- Teacher marks attendance
- Admin sends announcements

8. Risks

- Poor network coverage
- SMS cost
- Low digital literacy

9. Future Enhancements

- AI performance prediction
- Voice-based navigation
- Government integration
